Percent and proportions

Original CC0 evaluation fixture - generated locally

A percent p percent means p/100 of a quantity. A 20 percent discount multiplies the orig inal price by 0.80.

A proportion a/b = c/d can be solved by cross multiplication: ad = bc, when the denomina tors are nonzero.

Equations

Original CC0 evaluation fixture - generated locally

For a nonzero a, the linear equation ax + b = c has solution x = (c-b)/a.

The quadratic formula solves ax^2 + bx + c = 0 as x = (-b plus or minus sqrt(b^2-4ac))/(2a), for nonzero a.
